

Filling last-minute openings, calmly.

A working prototype that replaces the spreadsheet-and-text scramble with one fair offer at a time.

opening

one clear path to a filled
chair

THE PROBLEM

A cancellation creates an empty chair and a manual race to remember who was contacted, how long they have, and what happened.

From cancellation to a confirmed client

1

Add the opening

Staff enter the service, stylist, and appointment time.

2

Offer it fairly

The earliest eligible client receives a private offer.

3

Keep it moving

A decline, timeout, or delivery failure automatically advances the list.

4

Confirm one winner

The first acceptance reserves the chair and creates a Square update task.

Working staff view from the prototype

Simple for clients, honest about the demo

WORKING NOW

A private, phone-friendly accept or decline page.

A single winner when replies compete.

Staff visibility into every outcome.

SIMULATED OR EXCLUDED

Message delivery is simulated, and the 15-minute policy is compressed to 15 seconds.

No live SMS, Square changes, Google Sheets sync, or production sign-in.

Run one afternoon in shadow mode

Prove the handoff with real staff and real openings before connecting live systems.

- 01 Add a small opt-in waitlist.
- 02 Let the prototype handle offers while Square remains the source of truth.
- 03 Review whether staff stopped watching timers and clients understood the offer.
- 04 If the pilot works, connect real SMS first; add Square after the handoff is proven.

The screenshot shows the Juniper Salon Web UI. The main panel displays workflow details for 'juniper-opening-2-523ccded-463b-4085-91c9-65501c22' in shadow mode. The workflow is completed, with a duration of 31s 18ms. The input and output JSON are visible, showing details like 'opening', 'service', 'stylist', 'date', 'time', 'duration', 'offerWindow', 'createdAt', 'workflowId', 'candidateWorkflowId', 'candidates', 'requestId', 'clientName', and 'followUp'. The event history table at the bottom shows a sequence of events: Workflow Execution Completed, Workflow Task Completed, Workflow Task Started, Workflow Task Scheduled, External Workflow Execution Signaled, Signal External Workflow Execution Initiated, and Workflow Task Completed.

Event ID	Timestamp	Event Type	Details
85	Oct 5, 2026, 11:21:25.73 PM PDT	Workflow Execution Completed	Result: {"id": "523ccded-463b-4085-91c9-65501c222eba", "service": "Haircut & Finish", "stylist": "Lena", "date": "2026-10-05", "time": "14:00", "durationInMinutes": 60, "offerWindowInMinutes": 15000, "createdat": "2026-10-06T06:20:54.663Z", "workflowId": "juniper-opening-2-523ccded-463b-4085-91c9-65501c222eba", "candidateWorkflowId": "juniper-salon-demo", "candidates": [{"id": "69efc245-469e-4e3a-bab0-df2ff32b72e5"}]}
